39. Surgery
40. Therapeutics
41. Tuberculosis
42. Urology
43. Venereology, Dermatology
44. Zoology

Privately published under the auspices of the

EXECUTIVE COMMITTEE OF THE

FRIENDS OF THE ARMY MEDICAL LIBRARY

Washington, D. C.

SPECIAL LIBRARY COLLECTIONS

Collecting research literature by means of microfilms is not only advantageous to individuals, but also to librarians of the smaller institutions. Up to now the manner in which they have gathered the source literature of science is by way of sets of journals. The accumulation of these volumes has the disadvantage of preserving a large number of obsolete and irrelevant papers having no bearing on particular fields of research. Consequently, a good deal of money may be spent upon material of no immediate or possible usefulness.

At first sight it would appear that library collections could be augmented by means of microfilm copies of whole volumes of periodicals which are unobtainable. It must be apparent, that this plan has the disadvantages which have just been mentioned as well as others resulting from the difference between a bound volume and a roll of microfilm. Films differ so greatly from books in their dimensions as to preclude their being kept on shelves by the side of volumes to which they relate. Some appropriate means of filing them elswhere must be found. Furthermore films can be read only with the aid of a special apparatus and locating a given article in a long roll of film is quite a different matter from opening a book at the page desired.

The value of microfilm copies as a means of completing sets of journals is therefore not as great as might appear at first sight. As a matter of fact, this particular use of microfilms is opposed to their most useful application, which is in the separation and subsequent reassembling of the individual papers published indiscriminately in periodicals. The reproduction of entire volumes of journals on microfilm may be necessary in certain special cases but in general, it is far better for a librarian to secure only copies of those portions of periodicals which pertain to the work of his institution.

An objection which may be made here is that the cataloging and care of the numerous individual microfilm copies of papers thus obtained, would be troublesome. However the journals themselves are simply collections of more or less closely related papers in the fields described by their titles. The individual

(Continued on inside back cover)

CURRENT LIST OF MEDICAL LITERATURE is published weekly and lists of RECENT BOOK ACQUISITIONS are issued several times per year as supplements. The subscription price for both is $5.00 per year in the United States and $5.50 per year in other countries. The Recent Book Acquisitions may be obtained separately at $1.00 per year. Address communications to :

Medicofilm Service
Army Medical Library,
Washington, D.C.

1. Anatomy, Embryology, Morphology

Acta neerl. morph., 1941, 4:

ARIENS KAPPERS, J. Drei Falle von asymmetrischer Nahtobliteration. 1-9.
DESAIVE, P. Contribution radio-biologique a la demonstration de la fixite, dans l'ovaire de lapine adulte, des sources du developpement folliculaire. 10-30.
BOEKE, J. Innervationsstudien; zur Frage der Synapsen (und des periterminalen Netzwerkes) glomeruli cerebellosi, synapses a distance. 31-78.
BRETSCHNEIDER, L.H., DUYVENE DE WIT., J.J., & GOEDEWAAGEN, M.A. Das Legerohrenwachstum des Bitterlingweibchens (Rhodeus amarus) nach dem Prinzip der doppelten Sicherung (zugleich Skizze einer histo-physiologischen Analyse). 79-90.
WOERDEMAN, M.W. Self-differentiation of the lens-anlage of Rana esculenta after transplantation. 91-4.

2. Anthropology, Ethnology

Mitt. Anthrop. Ges. Wien, 1940, 70:

ZIMMER, F. Die Wamatengo. 304-23, 2 pl.
KLOIBER, A. Der schnurkeramische Schadel von Scharlinz, Ob.-D. 362-4, pl.

3. Bacteriology, Microbiology

Microbiology, Moskva, 1941, 10:

RUSAKOVA, G.S., & BUTKEVICH, V.S. Denitrification without the use of nitrates as a source of nitrogen. 137-62.
KORSAKOVA, M.P. Effect of aeration on the process of nitrate reduction. 163-78.
IMSHENETSKY, A.A. On the toxic action of glucose on myxobacteria. 179-84.
BELOZERSKY, A.N. On the composition of the protoplasm of the cells of Spirillum volutans in relation to the age of the culture. 185-99.
BACHINSKAIA, A.A. History of the development of the yeast fungus Saccharomycodes lipophora nov. sp. 200-7.
DOROSINSKY, L.M. Effect of bacteriophage on the development of clover. 208-15.
LOGINOVA, L.G. Adaptation of Saccharomyces cerevisiae to sulfurous anhydride. 216-21.
SKOPINTSEV, B.A. Mineralization of nitrogen and phosphorus of organic substances of fresh waters. 222-32.
WOLFSON, I.A., & MURATOVA, M.A. Isolation and selection of most active cultures of anaerobic heat retting of flax. 233-5.
EMELIANCHIK, K.G., & BORISOV, K.P. Anaerobic thermophile bacteria of canned foods. 236-41.
ISIUROVA, A.I. Determination of biochemical need in oxygen during isolation of water with vaseline oil. 242-6.
BYSTRY, N.F. Isolation of nodule bacteria from the soil by the method of chemotaxis. 247-9.
MOLOTKOVSKY, G.K. Celluloid cups for the determination of the nitrification of soils in situ for the culture of the azotobacter. 250.
MANTEUFEL, A.J. Autolysis of acetone-butyl-alsohol bacteria. 273-92.

KHOREVA, O.M. Morphological-physiological investigations of propionic bacteria. 293-8.
KORSAKOVA, M.P. Nitrate reduction to ammonia by certain facultative and obligate anaerobes. 299-313.
KRISS, A.E., & RUKINA, E.A. Effect of microorganisms on the concrete of fluvial hydrotechnical constructions. 314-22.
RUBENCHIK, L.I., & HEUCHERMAN, D.G. On the microbiology of mud lakes; investigation of the Molochny estuary. 323-32.
DEMENTIEV, K.I. Ferrobacteria of Staraia Russa mineral springs and lakes. 333-41.
MISHUSTIN, E.N. The microbiological factor in the formation of soil structure; review of literature. 342-56.

4. Biology

Proc. Soc. Exp. Biol., N. Y., 1941, 47:

WILLUMSEN, H.C., STADLER, H.E., & OWEN, C.A. Comparative effect of vitamin K and whole blood on prothrombin deficiency of newborn infant. 116-21.
GEISS, M.A. Differential cell counts of ant. lobe of pituitary glands of rats showing diabetic traits. 121-3.
TOOMEY, J.A., & TAKACS, W.S. Specific neutralization of cotton rat strains of poliomyelitis virus. 123-5.
CUTULY, E. Maintenance of pregnancy in the hypophysectomized rat. 126-8.
KIDD, J.G., & FRIEDWALD, W.F. A natural antibody reacting with sedimentable constituents of normal tissues. 128-30.
FRIEDWALD, W.F., & KIDD, J.G. Distinct types of antibodies in the blood of rabbits carrying the transplanted V2 carcinoma. 130-2.
HUBBARD, R.S., BUTSCH, W.L., & AARON, A.H. Excretion of sulfanilylguanidine in material drained from human biliary tract. 132.
ERF, L.A., & FRIEDLANDER, G. Phosphorus exchange in tissues of patients with lymphoid leukemia. 134-6.
SENDROY, J. JR. Photoelectric microdetermination of calcium in serum. 136-8.
GLASER, M.A., & SJAARDEMA, H. Electro-encephalographic diagnosis of extradural and subdural hemorrhage. 138-40.
STEWART, M.A., & EVANS, F.C. A comparative study of rodent and burrow flea populations. 140-2.
SELYE, H., & DOSNE, C. Changes in chemical composition of the blood coming from damaged tissues. 143-8.
MACKENZIE, C.G., & McCOLLUM, E.V. Muscular dystrophy in the absence of testicular degeneration in vitamin E deficiency. 148-52.
WECHSLER, I.S., MAYER, G.G., & SOBOTKA, H. Tocopherol level in serum of normals and patients with amyotrophic lateral sclerosis. 152-6.
McCHESNEY, E.W., & KOCHER, H. Comparison of effects of large doses of various activated sterols on serum calcium. 156-9.
LOOMIS, T.A., HUBBARD, R.S., & NETER, E. Inhibition of bacteriostatic action of sulfanilamide by yeast extracts. 159-63.
HERZ, R. Treatment of infected wounds in the hamster by contact application of ultraviolet rays. 164.
ZORZOLI, A., & RUGH, R. Parthenogenetic stimulation of aged anuran eggs. 166.
WELD, J.T., & MITCHELL, L.C. Effect of diet on anaphylaxis in the white rat. 168-70.

MARKLEY, G.M. A method for the experimental production of brain abscess. 171-5.
TRUSSELL, R.E., & JOHNSON, G. Physiology of pure culture of Trichomonas vaginalis; fermentation of carbohydrates and related compounds. 176-8.
LENNETTE, E.H. Susceptibility of Syrian hamster, Cricetus auratus, to viruses of St. Louis and Japanese B encephalitis. 178-81.
BOROFF, D.A., COOPER, A., & BULLOWA, J.G.M. Inhibition of sulfapyridine by the procaine in chest fluids after procaine anesthesia. 182.
REMINGTON, J.W., PARKINS, W.M., & HAYS, H.W. Influence of prolonged electrolyte deprivation and final restoration on fluid intake, balance and distribution. 183-7.
HOOKER, S.B., & BOYD, W.C. Widened reactivity of antibody produced by prolonged immunization. 187-90.

5. Cancerology

Bol. Liga cancer, Habana, Ed. soc., 1941, 12:

ANUNCIOS comerciales publicados en el programa de la fiesta que la Liga contra el cancer celebro en el Gran casino nacional el dia 20 de febrero de 1941. 11-8.
ODIO DE GRANADA, G. Como y cuando se fundaron los primeros centros anticancerosos. 26-30.

7. Chemistry

J. Am. Chem. Soc., 1941, 63:

COUPER, M., KIBLER, C.J., & LUTZ, R.E. Sodium acid dimethylmaleate. 2.
RICE, O.K. The interatomic potential curve and the equation of state for argon. 3-11.
HOARD, J.L., & MARTIN, W.J. Structures of complex fluorides; the stereochemistry of some fluocolumbate and oxyfluocolumbate complexes; the crystal structure of potassium oxyfluocolumbatepotassium bifluoride, $K_2CbOF_5 \cdot KHF_2$. 11-7.
COHN, E.J., FERRY, J.D. ET AL Studies in the physical chemistry of insulin; crystallization of radioactive zinc insulin containing 2 or more zinc atoms. 17-22.
LUCAS, H.J., SCHLATTER, M.J., & JONES, R.C. The isomeric 2,3-epoxypentanes and 2-pentenes; the extent to which mixtures of diastereomers are formed in reactions of some pentane compounds. 22-8.
TARTAR, H.V., NEWSCHWANDER, W.W., & NESS, A.T. A thermodynamic study of the system zinc sulfate-sulfuric acid-water at 25°. 28-36.
SCHOMAKER, V., & STEVENSON, D.P. Some revisions of the covalent radii and the additivity rule for the lengths of partially ionic single covalent bonds. 37-40.
MULLIKEN, R.S., RIEKE, C.A., & BROWN, W.G. Hyperconjugation. 41-56.
SMYTH, C.P. Induction, resonance and dipole moment. 57-66.
HUGGINS, M.L. Photographic Fourier syntheses. 66-9.
RABINOWITCH, E., & EPSTEIN, L.F. Polymerization of dyestuffs in solution; thionine and methylene blue. 69-78.
DWYER, F.P. Chelation in metallic triazene salts. 78-81.
DWYER, F.P., & MELLOR, D.P. The diamagnetism of nickel triazene complexes. 81-3.
NUTTING, G.C., & LONG, F.A. The change with time of the surface tension of sodium laurate solutions. 84-8.

STURTEVANT, J.M. Calorimetric investigations of organic reactions; the heats of ionization of glycine at 25°. 88-93.
GIBSON, R.E., & LOEFFLER, O.H. Pressure-volume-temperature relations in solutions; the energy-volume coefficients of carbon tetrachloride, water and ethylene glycol. 898-906.
CARTLEDGE, G.H. The chain carriers in Eder's reaction. 906-12.
DAY, R.A., JR., & PEASE, R.N. Kinetics of oxidation of typical hydrocarbons. 912-5.
HUGGINS, M.L. Densities and refractive indices of unsaturated hydro-carbons. 916-20.
KOMAREWSKY, V.I., & STRINGER, T.J. Catalytic dehydration and dehydrogenation of butyl and amyl alcohols. 921.
BRODE, W.R., & BROOKS, R.E. Optically active dyes; molecular asymmetry in dyes and their dyeing properties. 923-5.
PACSU, E., & TRISTER, S.M. The acetone derivatives of the mercaptals of some monosaccharides; crystalline 2-monomethyl d-mannose and its alpha-methylglycofuranoside, dimethyl acetal and dibenzyl mercaptal. 925-8.
GRIFFITH, W.H., & MULFORD, D.J. Choline metabolism; hemorrhagic degeneration and the labile methyl supply. 929-32.

Kolloid Zschr., 1941, 95:

KRUYT, H.R., & VOGEL, J.G. Ueber das Goldsol; Kettenbildung im elektrischen Wechselstromfelde. 2-20.
HASS, G., & KEHLER, H. Ueber eine temperaturbestandige und haltbare Tragerschicht fur Elektroneninterferenzaufnahmen und ubermikroskopische Untersuchungen. 26-9.
KARAOGLANOV, Z. Chemische Reaktionen in sehr verdunnten wasserigen Losungen. 43-58.
SCHEELE, W., STEINKE, L., & AVISIERS, I. Die Temperaturfunktion der Viskositat am Beispiel der Losungen von Anilin-Formaldehyd-Harzen in Kresol. 74-81.
WITZMANN, H. Theoretische Grundlagen der Filtration unter besonderer Berucksichtigung der Aerosolfiltration. 102-19.

Usp. khimii, 1941, 10:

SYRKIN, I.K., DIATKINA, M.E., & ZHUKHOVITSKY, A.A. Resonance in organic chemistry. 121-87.
NIGHTINGALE, D. The process of alkylization and effect of haloid aluminum on alkylbenzols. 188-223.
MARGARITOV, V.B. Vulcanization of rubber. 224-55.
BALANDIN, A.A. Catalysis and modification of of the form of the molecule. 262-93.
GRINBERG, A.P. Isomeric states of the atomic nucleus. 294-307.
GLASSTON, S., & HICKLING, A. Role of peroxide hydrogen in electrolytic oxidation. 308-34.
SMITH, J.K. Fatty acids and other compounds with long chains. 335-49.
KURCHATOV, I.V. Pan-Union congress on the physics of the atomic nucleus. 350-8.

8. Dentistry, Stomatology

Contact Point, 1940-41, 18:

FINGER, E.M. Management of the child patient in general practice. 255-63.
BROWN, S., & WESTMORELAND, W. The present status of non-surgical treatment of paradentosis. 265-73.

papers collected in microfilm form with little effort could be assembled into groups of even more homogeneous character than those composing the journals. In this way library collections of source material could be made at far less expense than by the purchase of back numbers of the journals. The separate film copies may be placed in envelopes or may be attached to sheets of paper which are kept in binders of dimensions corresponding to bound volumes and placed on shelves by the side of the books or journals relating to the same subject.

This system permits the assembling of more highly specialized library collections than can be made in any other way. The librarian of a small research institution who ordinarily keeps up with the new publications having reference to the problems of his institution would simply extend his activities to locating and acquiring film copies of research papers appearing in scientific periodicals. References to these would be found in the abstract journals, catalogues of titles and indices which are the indispensible accompaniments of every special library. In addition to compiling bibliographies of the titles of contributions to particular problems, librarians can go one step further and obtain microfilm copies of each paper pertaining to a particular subject. When properly filed in binders or cases these would replace the journal collections which ordinarily only partially supply the needs of research investigators in the smaller institutions.
